

GREENSTONE DOCUMENTATION

SUBJECT HIERARCHY

1. Start collection building through Greenstone Librarian Interface
2. Select “DC metadata” also in the metadata standard selection
3. In Enrich panel give subject hierarchy in “dc.Subject and Keywords” within “|” (pipes). For eg. To create a collection Painting, under the head ART, INDIAN ART, PAINTING, give dc.Subject and Keywords as (subject space pipe space)

Eg: ART | INDIAN ART | PAINTING

4. Select “ Search Index” and give index name as “keywords”.
5. Build indexes on dc title, subject, keywords, dc title, subject,keywords etc. remove existing indexes on exe files.
6. From Design panel select Browsing Classifiers. Select “classify AZCompactList “ and click –metadata “ dc.Title”.
7. Select hierarchy, and click on “Add classifier”. Choose metadata as “dc.Subject and Keywords”; select sort as “title” and choose button as “subject”
8. Build the collection
